Environment, Nature Conservation
and Nuclear Safety

Potsdam University (Palais Sanssouci)

The *Emerging Modes of Governance and Climate Protection* research project is organizing an invitation only international workshop in Potsdam and Berlin, Germany to take place in July 2008. Host country experts, European and International policymakers and carbon market actors will gather to discuss the findings of an in-depth field study, conducted during the past six months by the Potsdam University research team in Brazil, China and India. The main topic of discussion will be the interplay of public and private actors in the CDM markets in the countries that hold over 70 per cent of the CDM market.
